

What We Believe Is Important to the Seniors You Love

**By Carolyn Mattingly
Advantage Senior Care, Inc.**

Advantage Senior Care, Inc. is a non-medical, independent in-home care agency providing highly skilled companion caregivers and certified nursing assistants who serve our clients based on these beliefs:

What We Believe at Advantage Senior Care, Inc.

We believe that superior service begins with the agency's integrity and faith. We are grounded in Christian principles...love, joy, peace, patience, kindness, goodness, faithfulness, gentleness, and self control with respect, passion and compassion for seniors and their families.

We believe that seniors should enjoy the comfort and privacy of their own home and remain as independently as possible through individualized and meaningful support.

We believe that health and safety must come first.

Our well trained caregivers focus on fall prevention, a home safety check, good hygiene, infection control, nutrition, exercise and preplanning for emergencies such as weather alerts and senior health issues.

We believe in innovative care that helps seniors age gracefully, socialize often and have access to appropriate community services.

We believe in care continuity.

The client needs the same caregiver each time to help assure care stability and client and caregiver bonding, providing a greater sense of peace for the entire family.

We believe that each client is a unique individual with a legacy to share, with great potential to give to others and has the right to receive from others in return.

We believe that superior service requires the administration and the caregivers to have extensive knowledge in the aging process and the typical diseases of our seniors.

We believe that family caregivers need superior support and educational tools provided by our agency to help their loved ones make proactive, wise decisions about planning for the future.

If you believe as we believe and if your loved one needs extra care, call us at 404-312-6423 for a free home care assessment.
